ABOUT KAMBO

The kambó is a natural and very effective therapy, which has been used for thousands of years by the tropical rainforest tribes of the western north, including Peru, Brazil and Colombia. The natives rubbed the frog's back through the body to strengthen themselves and thus be able to hunt avoiding being affected by bugs and snakes. On the other hand, they used it to promote health, strength, well-being and also to eliminate 'panema' or bad luck.

According to what is known, the Kambó has been used in up to 53 tribes of the Amazon, but today there are only a few who use it, such as: the Matsés, Yawanawá, Katukina and Apurina. The Kambó is also referred to as Kampu, Campu, Chambó, Toad Vacino da Floresta or "Giant Monkey Frog".

The remedy is the secretion (in the form of cream) that produces, as a defense system, this tree frog scientifically known as: *Phyllomedusa Bicolor*. This secretion is extracted from his back, without causing any damage to this beautiful frog. This amphibian has no natural predators, so the idea that when applied kambó would absorb energy the fear and stress of the frog would not make sense. The frog, after sharing this secretion with the healers, is returned again to its daily life in the natural environment (between branches and vines of ayahuasca).

The Kambó collected is applied under the first layer of the skin, after making small superficial burns, which are made millimetrically with a very thin stick, to quickly act and circulate throughout the body. The kambó immediately flows through the lymphatic system generating the activation of all the systems of the body, and at the same time, a strong purge and total cleaning that lasts approximately 15 minutes.

PROPERTIES AND BENEFITS

The properties of Kambó peptides cover a wide range of possible medical uses in the treatment of brain diseases such as Alzheimer's, parkinson's, paralysis, depression, migraines, blood circulation problems, vascular insufficiency, organ diseases, problems of skin and eyes, fertility problems in women and men, AIDS, hepatitis and cancer.

Other interesting medical features of this secretion are its anti-inflammatory effects, its ability to destroy microbes and viruses, and to heal infections. Due to the presence of these peptides, Kambo is one of the strongest natural antibiotics and anesthetics found in the world and one of the strongest natural means, in addition to strongly awakening and boosting our immune system.

Fernando & Nayely are Mexican shamans/facilitators (DARHSANA), They have travelled around the world to meet and share the medicine with the most important leaders of the sacred tribes in Mexico, USA, Colombia, Peru and Brasil. They have received blessings and instructions on how sacred medicines should be given to each patient, they practice with the medicines Bufo Alvarius (the toad medicine), Ayahuasca, Kambo, and Xanga. Fernando and Nayely use the techniques given to them to help brothers and sisters overcoming traumas, addictions and mental disorders or self-destructive behaviours.

Yogesh & Atlantis are here to spread love and light for the healing of our cosmic family. Walking with our brothers and sisters home with humble confidence. Singing to the supreme consciousness, chanting mantras and sacred ancestral hems. Yogesh and atlantis hold space and work with energies necessary for the awakening of the heart and transmigration of the spirit during the ceremonial processes.

The medicine they all carry comes straight from the Amazon Jungle and the Sonora desert and it is 100% pure, with an ethical gathering of the medicine, by members of the tribes, meaning no harm to the plants or the animals that carry the medicine. (All of this sacred medicine are 100% natural and no industrial process or manipulation altering the natural state are done).
